UNIT 4 CODE QUEST

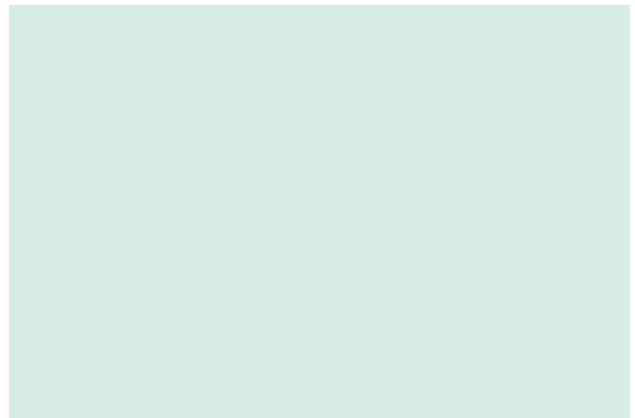

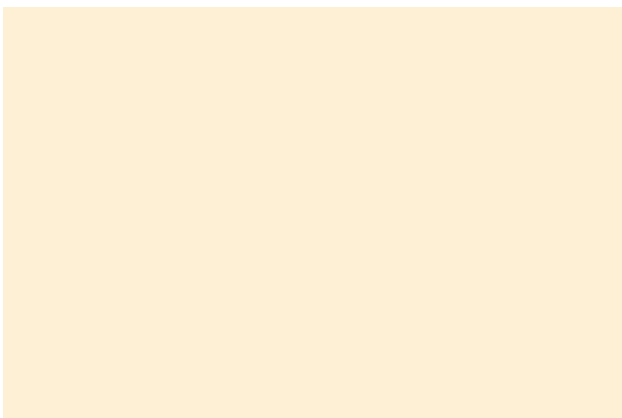

Applying Knowledge (code & debugging)

CODE

DEBUGGING

- 1 What if we use an 'if statement' on its own, without an 'else-if statement'?
- 2 What if we use a 'while statement' instead of an 'if statement'?

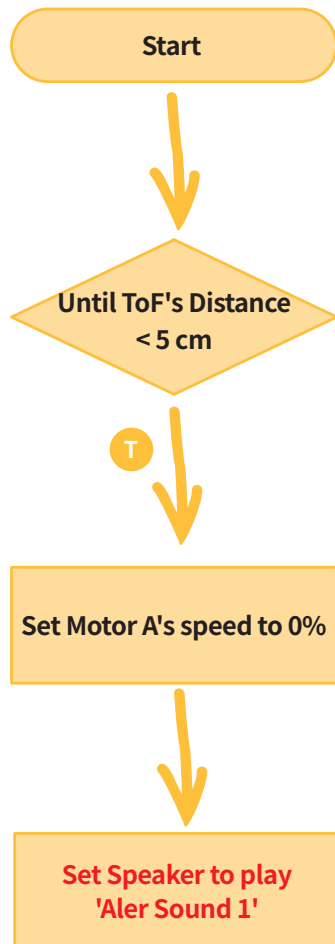

Missions

Mission1

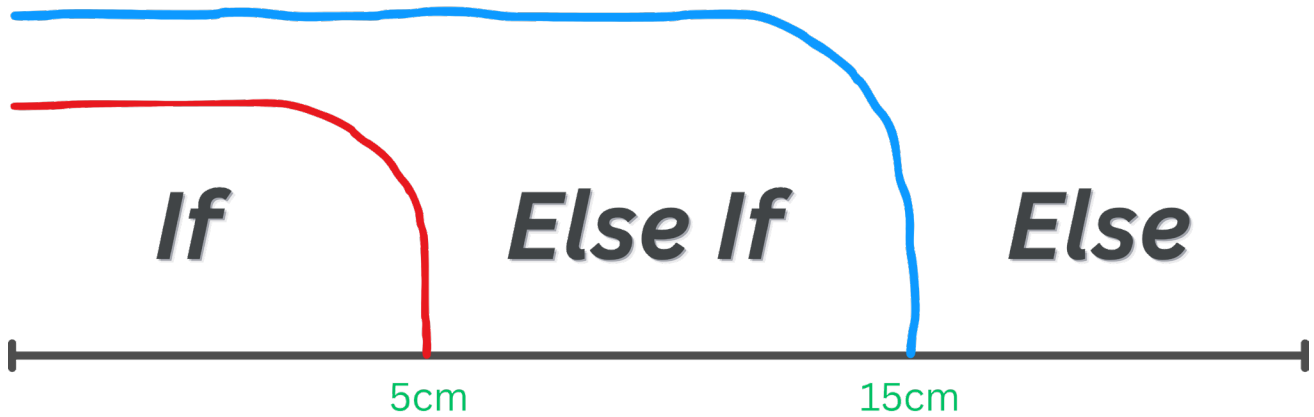

- 1 Adding an alert function: Let's add alert when someone is too close to the fan with the speaker. Fill in the blanks and determine where this pause should be integrated into the flowchart.

- 2 Based on the flowchart you've just created, write the corresponding code.

Misson2

- 1** Simplify the code using the 'and' operator: Refer to the figure below, which illustrates the range of the code you learned earlier. Color the area where your fan operates.

- 2** Based on the figure above, write the corresponding code.
