UNIT 1 HOW COMPUTERS HELP US EVERY DAY

Why Learn About Computers?

Welcome to your journey into the world of computers! Have you ever wondered why computers are so important in our lives?

In this chapter, you will learn how computers help us every day, how they might change in the future, and why learning about them is so important. Let's get started!

Hello! Computers are amazing tools that help us learn and have fun. Let's discover how they can be a big part of your life!

Computers in Our Daily Lives

Computers are everywhere! From the moment you wake up, computers are a part of your day. In this unit, you'll explore how we use computers at school, at home, and in other places. You'll see how they help us learn, play, and do many different things.

COMPUTERS AT SCHOOL

In school, computers help you with research, typing your stories, solving math problems, and even creating art! They are tools that make learning more interesting and fun.

COMPUTERS AT HOME

At home, you might use a computer to play games, watch videos, or chat with your friends.

But did you know you can also use it to learn new things, like how to cook, build, or draw? Computers are great for hobbies too!

COMPUTERS IN THE COMMUNITY

When you visit a store, a library, or even a doctor's office, computers help things run smoothly. They keep track of books at the library, help doctors check your health, and make shopping easier.

Inquiry & Reflection

How Do You Use Computers?

Let's think about all the ways you use computers every day.
Here's what you need to do:

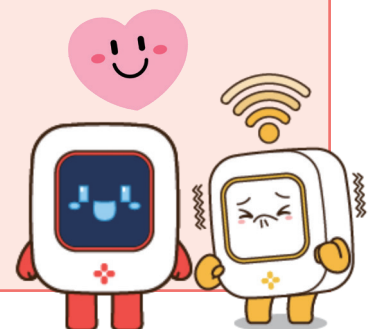

1. WRITE IT DOWN

Make a list of all the things you do with a computer each day. Do you play games, watch videos, or maybe do homework? Write them down!

2. DRAW IT OUT

Draw a picture of you using a computer. You can show yourself doing something fun or helpful with it.

Discussion Prompt

Once you've completed your list and drawing, think about these questions:

1. What's your favorite thing to do on a computer?

2. How does a computer help you with schoolwork or learning new things?
