UNIT 2 THE FUTURE OF COMPUTERS

Have you ever imagined what computers might look like in the future?

Will they be tiny enough to fit in your pocket or powerful enough to help you do things you never thought possible?

In this unit, we'll take a fun look at how computers might change and what new things they could do in the future. Let's explore some exciting possibilities together!

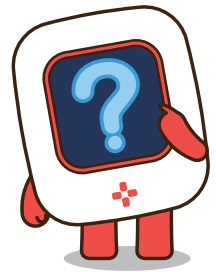

Imagine the Future

Can you imagine how computers in the future will look like? Computers have been getting smaller and smarter over the years.

Today, we can even wear computers on our wrists like watches! In the future, computers might be even more convenient and powerful.

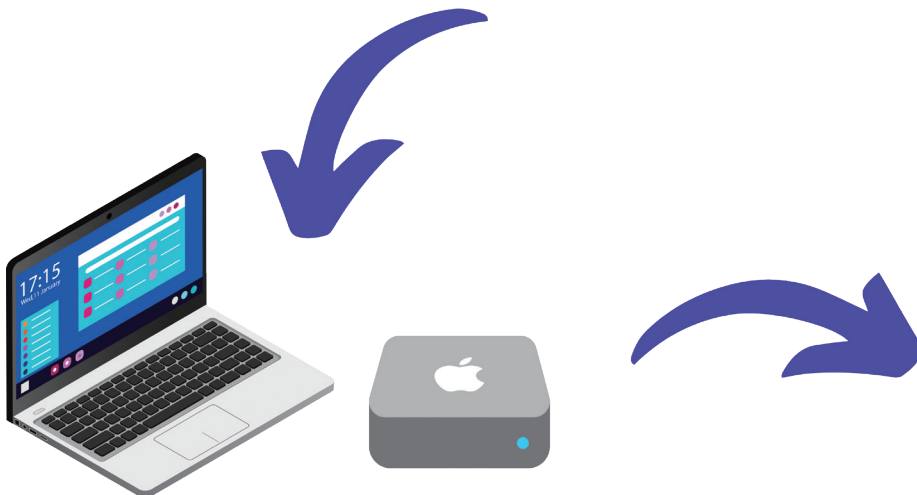

They could fit in our clothing, or even be a part of our glasses, helping us learn, play, and work in ways we can't even imagine yet. What do you think computers will be able to do in the future?

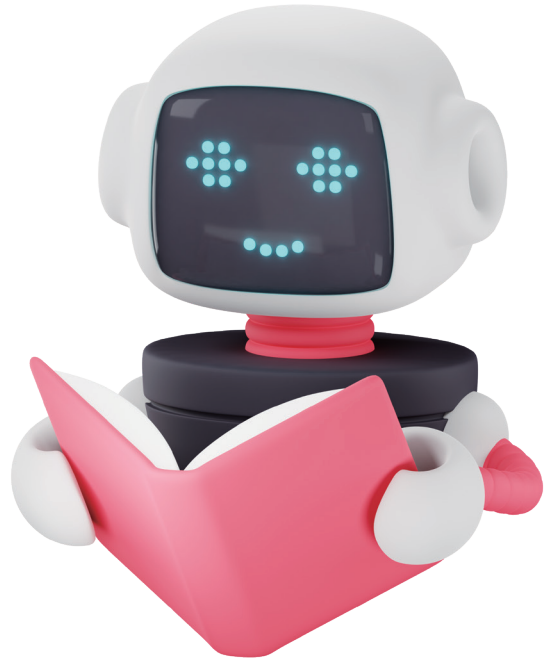

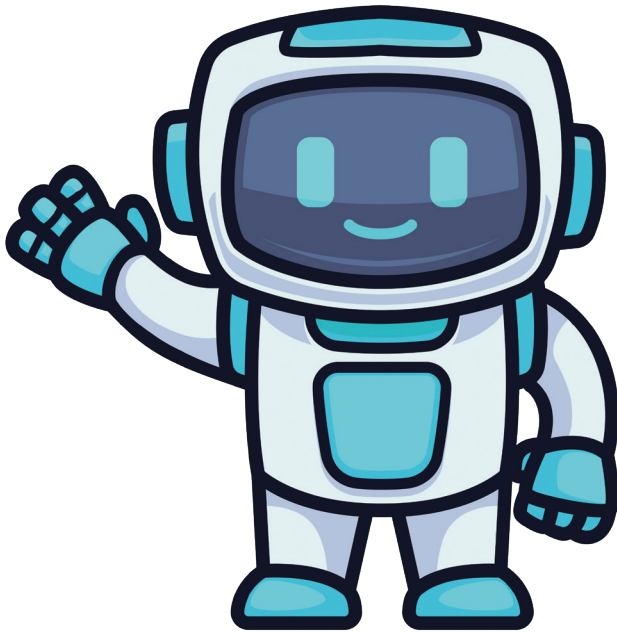

SMALLER AND SMARTER COMPUTERS:

In the future, computers might be even smaller and smarter than they are now. Imagine a computer that you can wear like a watch or one that can fit into your eyeglasses!

ROBOTS AND COMPUTERS:

Robots that help around the house, teach new skills, or even explore space might be a big part of the future. These robots will use powerful computers to think and learn.

NEW WAYS TO LEARN AND PLAY:

Computers might change the way we learn and play.

Imagine virtual classrooms where you can travel anywhere in the world or games that make you feel like you're inside them!

Activity

Design Your Future Computer

It's time to get creative! Think about what computers might be like in the future. What will they look like? What will they be able to do?

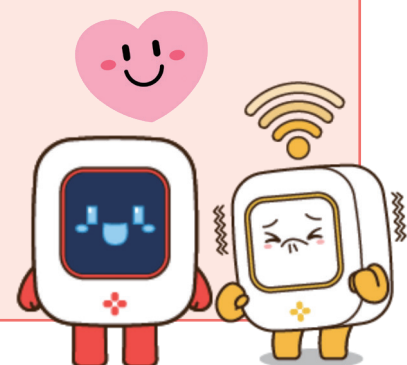

1. DRAW YOUR FUTURE COMPUTER:

Draw a picture of what you think computers will look like in the future. Will they be small enough to carry in your pocket, or big enough to help build a house? Will they be shaped like a tablet, a robot, or something totally new?

2. WRITE ABOUT IT

Under your drawing, write a sentence or two about what your future computer can do. How will it help people? What makes it special?

Sharing Tim

After you've designed your future computer, share your ideas with your classmates. Show them your drawing and explain what your computer can do. Listen to their ideas too—who knows, maybe one day these computers will become real!

Name Your Favorite Computer:

After everyone has shared their drawings and ideas, think about which future computer you liked the most. Was there a computer that you found really cool or useful? Name your favorite computer idea out of your classmates' designs and explain why you liked it!

Your Favorite Computer:

Always Pay Attention to Your Classmates' Sharing!
Listening carefully to your classmates helps you learn new ideas and respect others' creativity.
