Unit 2 - If else Statement

PDF Documents

PDF Document 1: 1734178224169-Chapter 3 - unit 2 - If else Statement.pdf

This PDF document is included in the unit materials.

UNIT 2 IF ELSE STATEMENT

✓ ELSE

condition 1

If it's raining outside,

task 1

Take an umbrella.

condition 2

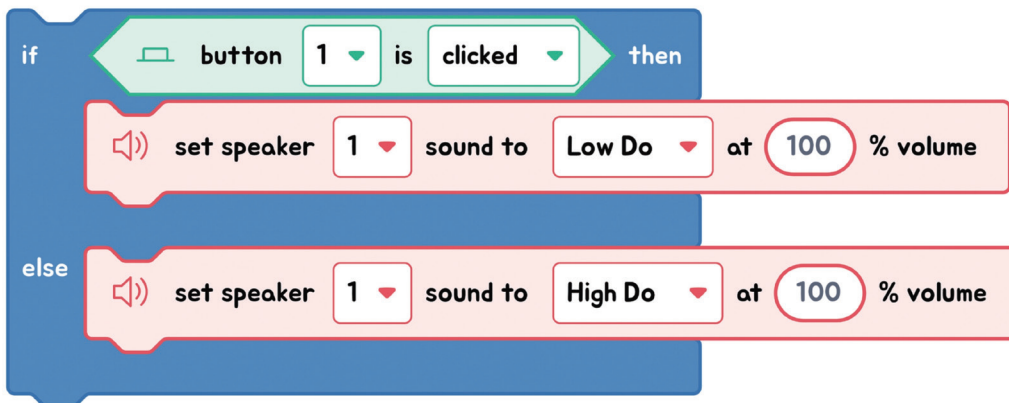

Otherwise,

task 2

Leave it at home

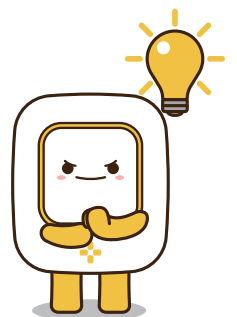

If else statement is similar to the if statement; it just adds an else part, which means when the if condition is false, it follows a task in the else part.

EXECUTION IF FALSE

While in most cases only the 'if' block is present, sometimes tasks can be specified to execute if the condition is false. Therefore, in this case, when the button is not clicked, the speaker makes the sound as High Do with 100% volume.

The main point of the if-else statement is to execute the actions specified in the else part if the condition of the if statement is not met!

Exercise

1. Change this code to if-else statement in Code Editor.

```
network
repeat forever
  turn off LED 1
  if dial 1 turn > 50 % then
    set LED 1 light to red
```

2. Make the code in Code editor based on the story below:

We will make a sensor light, if an object is near by the sensor the light will be on! if not the LED is off.

```
network
repeat forever
  if ToF 1 distance < 15 cm then
    set LED 1 light to yellow
  else
    turn off LED 1
```

By monitoring with ToF, Find the distance when you want to light it up!
