UNIT 4 DIVE INTO FLOW

HOW AUTOMATION HELPS IN PUBLIC AREAS

Automation is a fantastic way to make public spaces work more smoothly and efficiently. In public areas, automation systems can be very helpful. For example, in places like malls, airports, or schools, automated systems help manage many tasks.

AUTOMATIC LIGHTS In public spaces, automatic lights can turn on when people enter a room and turn off when no one is around. This helps save energy and makes sure that lights are always on when needed.

ELEVATOR CONTROLS Automated elevators can move to different floors based on where people want to go. This makes getting to different floors much easier and faster.

OTHER EXAMPLES OF USEFUL AUTOMATED SYSTEMS

SELF-CHECKOUT MACHINES In stores, self-checkout machines let people scan and pay for their items without needing help from a cashier. This speeds up the checkout process and makes shopping easier.

SMART THERMOSTATS In buildings, smart thermostats automatically adjust the temperature based on the time of day or the number of people inside. This helps keep everyone comfortable and saves energy.

Multiple Choice Questions

1 What does the red LED indicate in the restroom indicator system?

- ☐ A The restroom is available
- ☒ B The restroom is occupied
- ☐ C The restroom is under maintenance
- ☐ D The dial is broken

CORRECT ANSWER

B

2 Why is it important to use different colors of lights in an indicator system?

- ☒ A To signal different statuses clearly
- ☐ B To make the system look more colorful
- ☐ C To save on electricity
- ☐ D To make the system more complex

CORRECT ANSWER

A

3 In restroom indicator creation, what is input?

- ☒ A Button
- ☐ B Dial
- ☐ C Network
- ☐ D LED

CORRECT ANSWER

B

Reflection Questions

- 1 Why do you think it's important to have a light indicator system in public restrooms?

- 2 Can you think of other places where indicator lights could be useful?

- 3 How does automation improve our daily routines?
