Unit 3 - Designing Solutions

PDF Documents

PDF Document 1: 1738064670905-Chapter 7 - unit 3 - Designing Solutions.pdf

This PDF document is included in the unit materials.

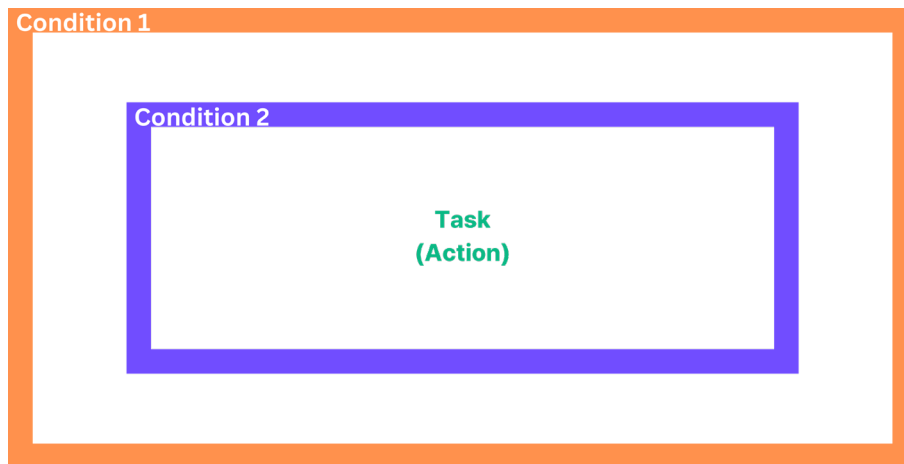

UNIT 3 DESIGNING SOLUTIONS

Programming Concepts

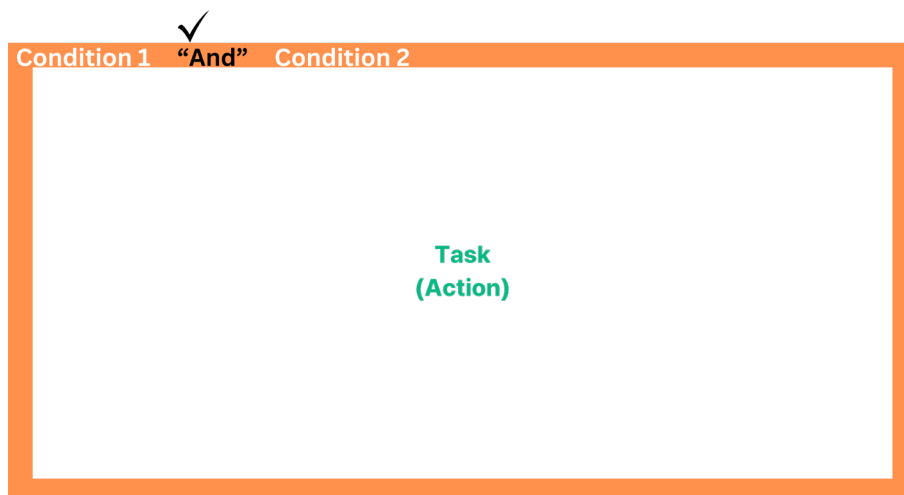

NESTED IF STATEMENT

We use 'nested if statements' when we need to check several things before making a decision. The actions in these statements happen only if all the conditions are true.

SIMPLIFYING WITH 'AND'

Instead of using many nested ifs, we can use the 'and' operator. This makes our code simpler and easier to understand.

MORE THAN TWO CONDITIONS

A nested if statement can check three or more conditions, allowing us to make decisions based on multiple factors.

Flowcharts & Algorithms

Let's read the flowchart and create the code.
