UNIT 4 CODE QUEST

Applying Knowledge (code & debugging)

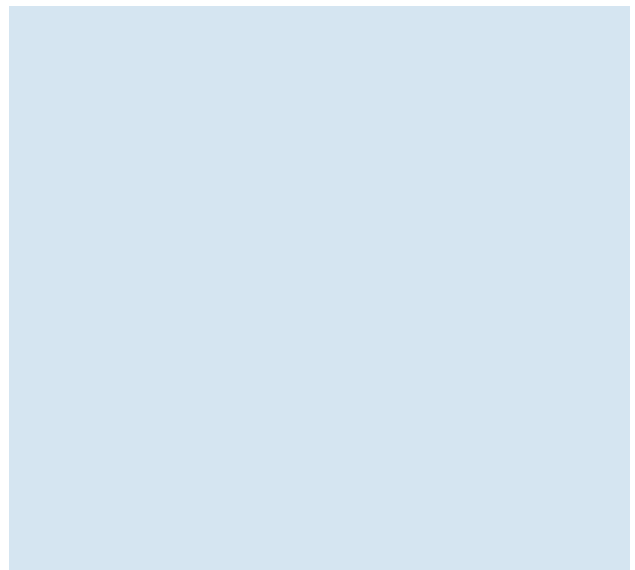

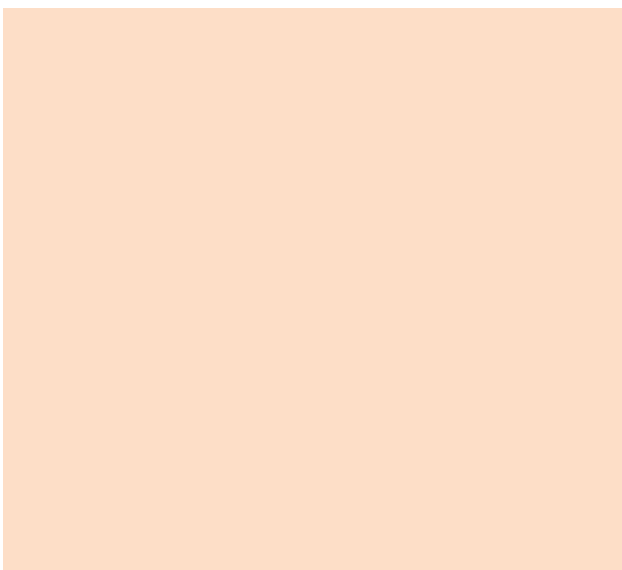

CODE

DEBUGGING

- 1 What if the 'wait' block is missing?
- 2 What if the variables for the RGB colors go negative?

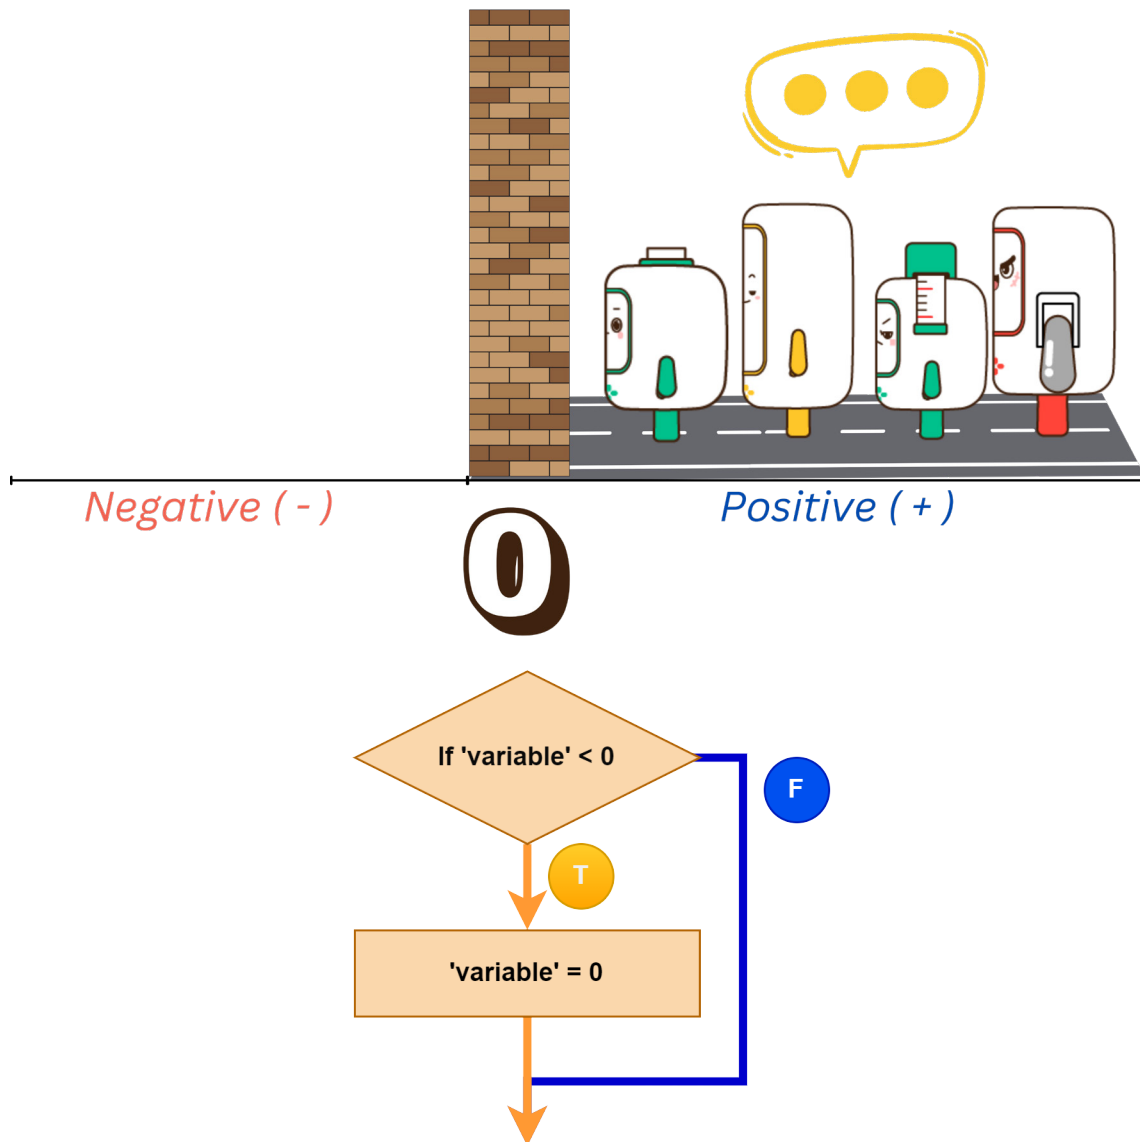

Missions

Mission 1

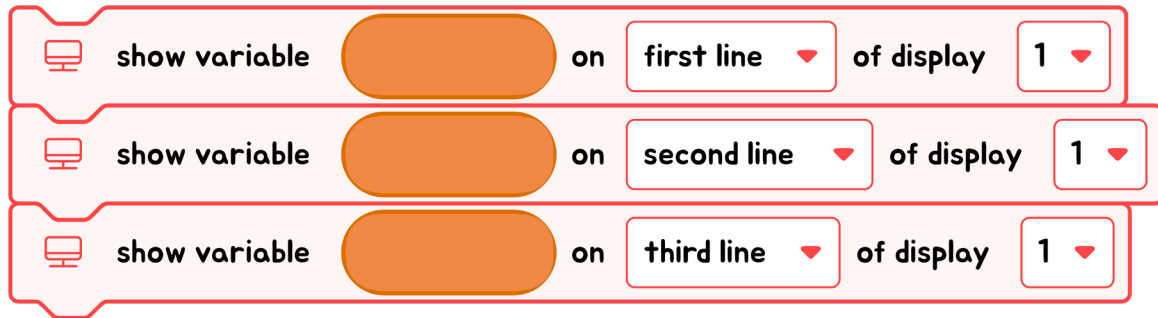

- 1 **Handling Negative Variables:** Solve the issue of negative values in RGB color variables.

- 2 Based on the flowchart, make the code.

Mission2**1** Change the display output to show color values instead of the mode.

Modify the existing code so that the display module shows 'red', 'green', and 'blue' values dynamically as they change, rather than just showing 'mode'.

**2** Based on the answer above, make the code
