UNIT 4 CODE QUEST

Applying Knowledge (code & debugging)

CODE

**DEBUGGING**

- 1 What if a button is clicked instead of pressed?
- 2 What if 'turn off' blocks are missing in a program?

**THINK ABOUT IT!**

Imagine you're in an emergency during an earthquake. Consider whether the questions above would help you better utilize the alarm system!

Missions

Mission1

- 1 Set the Alarm Duration:** Let's configure the alarm to sound for 4 seconds and then stop automatically.

Time for a single alarm cycle: ____ secs

For a 4-second duration, the alarm should repeat ____ times.

- 2** Based on the number you filled in the blank, modify the code accordingly.

TIPS

Since this requires a repeat statement, locate the appropriate block under the 'Repeat' tab!

Misson2

- Adjustable Vibration Sensitivity:** Let's enable the vibration threshold to be adjusted at any time using a dial.

TIPS

Find a suitable dial value to enter in the blank.

- Refer to the figure provided and update the code as necessary.
