UNIT 4 CODE QUEST

Applying Knowledge (code & debugging)

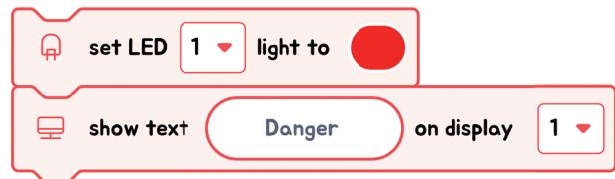

CODE

DEBUGGING

1 What would happen if we changed the inequality sign from when it is larger than 10cm to when it is smaller than 10cm?

2 What is these 2 blocks' role?

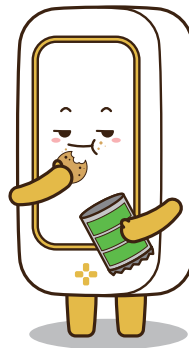

MISSION 1

- 1 Let's use an LED to add an alarm function that regularly turns on a green light and **blinks** a red light when water approaches.

TIPS

Use wait block properly

- 2 When the water is close, change the red light to yellow, orange, and red in the order by using below block.

 set LED

 %

**MISSION 2**

- 1 Add speakers to make an alarm sound when the sensor is closer to the water.

- 2 When the water is far from the sensor, the alarm must be stopped. Add this initialization part in code.
