UNIT 4 CODE QUEST

Applying Knowledge (code & debugging)

CODE

DEBUGGING

1 What would happen if the 'set Motor A angle to 0' block is missing?

2 What coding methods are there to control the moving speed of the motor?

Missions

Mission 1

- 1 When moving the motor to the desired position, we also want to control the speed. Let's modify the code using the block below.

Mission 2

- 1 Rather than coding the speed directly, I am trying to control the speed using a dial. Let's add a dial module, as shown below, and modify the code to control the angular movement speed with a dial. Please translate
