UNIT 3 PROGRAMMING A COUNTDOWN

What is a Countdown?

Imagine you're about to open a present on your birthday. You might count down from 5: "5, 4, 3, 2, 1!" and then open the present. This is a countdown.

A countdown is when we count backwards from a number to zero to mark the start of something. It's like a timer that helps us know when something is about to happen.

HOW IT WORKS IN ACTION:

We're going to use something called MODI to make our own countdown. MODI is like a set of electronic building blocks that let us create fun projects.

WHAT WILL WE DO?

PRESS A BUTTON

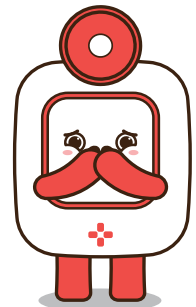

This will start our countdown.

WATCH THE COUNTDOWN

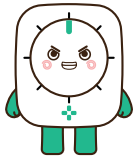

The MODI will show us the numbers counting down from 5 to 1.

HEAR THE COUNTDOWN

The MODI might make a sound to let us know when the countdown is over.

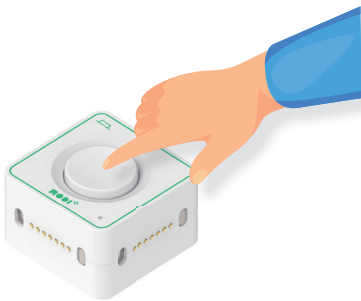

Do you remember which action Button can received?

Do you remember which action Button can received?

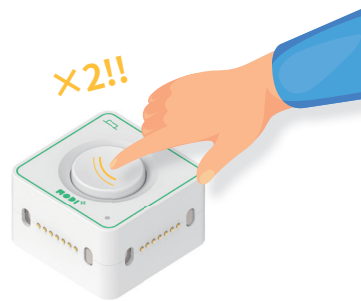

Button can receive 4 types of information.

1. CLICK

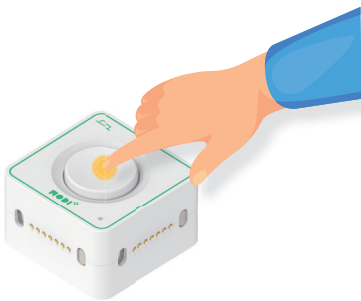

Detects if Button is clicked or not.

2. DOUBLE CLICK

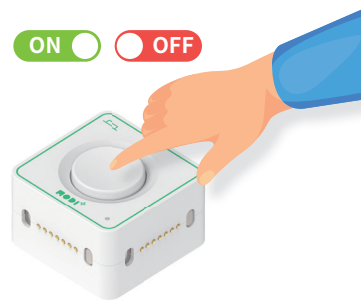

Detects if Button is double - clicked or not.

3. PRESS

Show the press status of Button.

4. TOGGLE

Changes on / off when Button is clicked.

Activity: Create **Your Own Smart Wastebin**

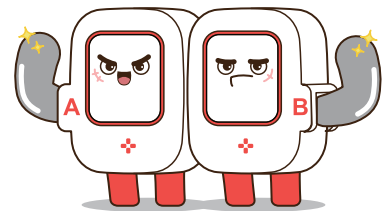

1 Materials Needed:

Button

Speaker

2 Code story

Turn off Speaker

If the Button is clicked

Wait 5 seconds

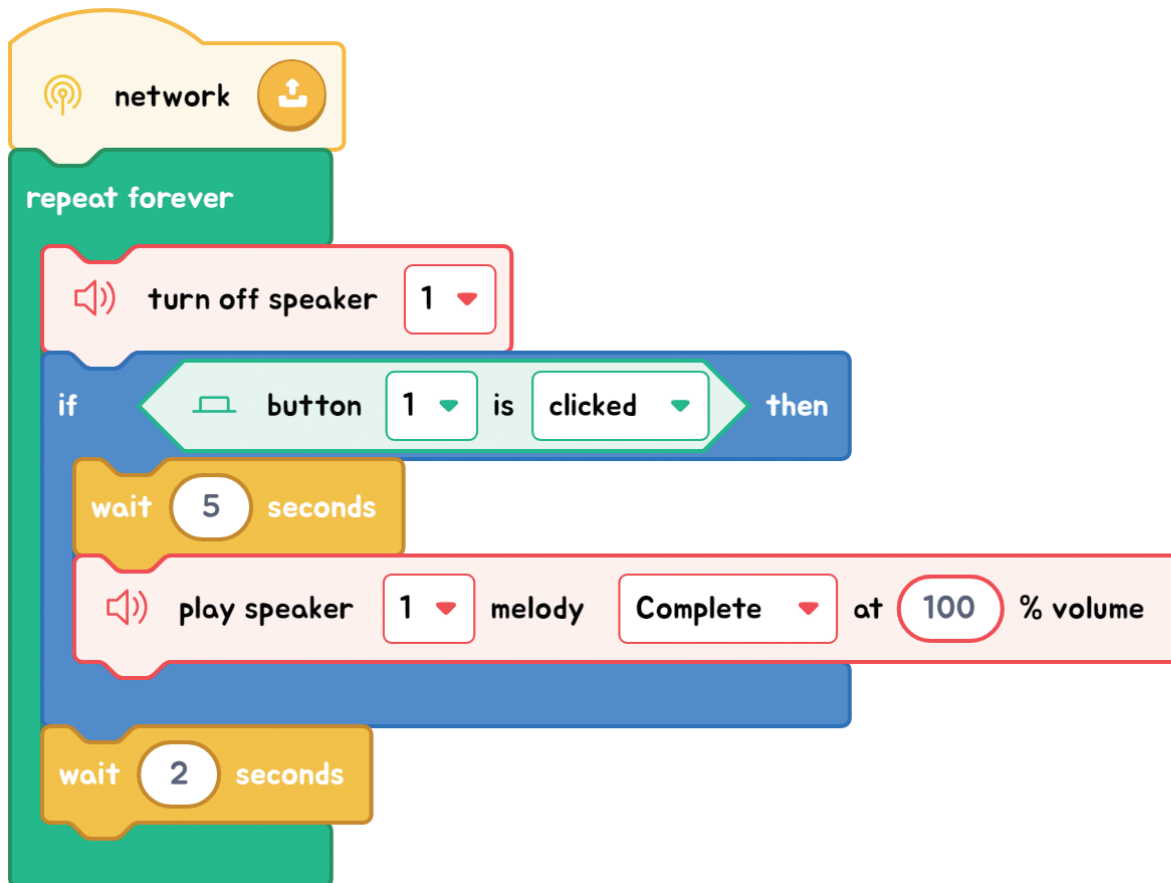

Play complete sound on the Speaker

Wait 2 seconds

Code Quest

Checkpoint

Let's add a code that shows a red light when the countdown is done.

HINT!

When the button is not clicked, the LED has to be off.
