UNIT 4 DIVE INTO FLOW

The Future of Cars

The future of transportation is exciting! Imagine cars that drive themselves, run on clean energy, and even talk to other cars. In this unit, you'll learn about the new technologies transforming how we travel—from self-driving cars to electric vehicles and AI.

SELF-DRIVING CARS

Cars that can drive themselves are being developed today! Using sensors, cameras, and AI, these cars can navigate roads, avoid obstacles, and safely get you to your destination without needing a driver.

ELECTRIC CARS

Electric cars run on batteries instead of gasoline, making them cleaner for the environment. You can charge them at stations or at home, and they produce no harmful emissions, helping to reduce pollution.

AI IN CARS

AI will make cars smarter, helping them choose the best routes, avoid traffic, and manage the car's systems. In self-driving cars, AI will control the entire driving experience.

Multiple Choice Questions

1 What was one of the first methods used to control early cars?

- ☐ A Joysticks
- ☐ B Steering wheels
- ☒ C Levers and cranks
- ☐ D Voice commands

CORRECT ANSWER

☒ C

2 How does a joystick control movement in a machine?

- ☐ A By turning a wheel
- ☐ B By sending input signals to control direction
- ☒ C By moving the machine manually
- ☐ D By typing commands

CORRECT ANSWER

☒ B

3 Which of the following is a key feature of future cars?

- ☐ A Gasoline engines
- ☒ B Self-driving technology
- ☐ C Manual transmissions
- ☐ D Horse-drawn carriages

CORRECT ANSWER

☒ B

●● Reflection Questions

- 1 How would using a joystick to control a car be different from using a steering wheel? What are the benefits or challenges of using a joystick for driving?

- 2 Imagine you are in the future with self-driving cars. How do you think self-driving technology, renewable energy, and AI will change the way we travel and live?
