UNIT 1 WHAT ARE WINDSHIELD WIPERS?

Windshield wipers are essential tools found on cars that help keep the windshield clear. They move back and forth across the glass, wiping away rain, snow, and debris. This action helps maintain clear visibility for the driver, making it easier and safer to see the road during bad weather. By keeping the windshield clean, wipers play a crucial role in ensuring safe driving conditions.

HOW DO WINDSHIELD WIPERS WORK?

Windshield wipers are powered by a small electric motor typically located near the base of the windshield. This motor connects to the wipers through a system of mechanical arms.

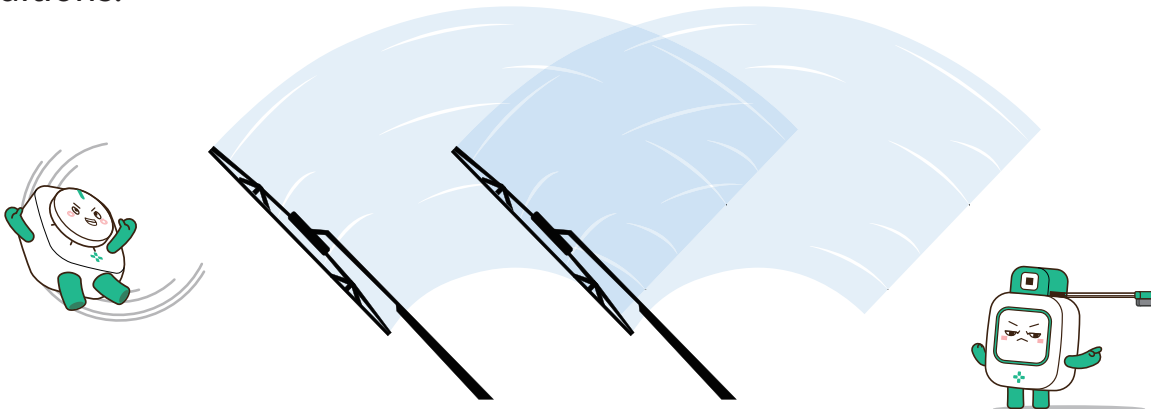

When activated, the motor moves these arms, causing the wipers to sweep back and forth across the windshield.

Attached to these arms are rubber blades, designed to make smooth contact with the glass. As the blades move, they drag water, snow, and debris from the center of the windshield to the edges, effectively clearing the driver's view and pushing the unwanted elements off to the side of the windshield. This system ensures that the driver maintains good visibility even during adverse weather conditions.

WHY ARE WINDSHIELD WIPERS IMPORTANT?

Clear visibility is fundamental for safe driving; it allows drivers to see road conditions, traffic signals, and potential hazards clearly. In bad weather, visibility becomes even more critical as rain, snow, and debris can quickly obscure a driver's view, increasing the risk of accidents.

Windshield wipers are essential in maintaining this visibility. When it rains or snows, wipers swing into action, moving back and forth across the windshield to sweep away water, snow, and any other debris. This action clears the driver's field of vision, enabling them to see the road, pedestrians, and other vehicles clearly. By removing these visual obstructions, wipers help prevent potential accidents and allow for safer driving conditions in unfavorable weather.

Activity: _____

Let's find some examples of how wipers are used in everyday life.

Where	Description
<i>example: Buses</i>	<i>example: Windshield wipers: Buses also use windshield wipers to clear rain, snow, and dirt from their windshields, ensuring the safety of passengers.</i>
