UNIT 4 DIVE INTO FLOW

Mary Anderson: The Inventor of the Windshield Wiper

A CLEVER MIND FROM ALABAMA

Mary Anderson, a remarkable woman from Alabama, is the inventor of the windshield wiper. While she also excelled as a real estate developer and cattle rancher, her most significant contribution to modern transportation is the device that keeps our windshields clear.

A PROBLEM AND A SOLUTION

During a visit to New York City in 1903, Anderson observed a streetcar driver struggling with poor visibility due to falling sleet. Inspired by this challenge, she set out to create a solution.

THE INVENTION

Anderson hired a designer to develop a hand-operated windshield wiper. This innovative device used a spring-loaded arm to sweep the windshield back and forth, ensuring clear vision for the driver.

OVERCOMING OBSTACLES

Despite her invention's potential, Anderson faced initial resistance from car companies. However, her perseverance paid off, and by the 1920s, windshield wipers became a standard feature on automobiles.

A LASTING IMPACT

Mary Anderson's invention has had a profound impact on our daily lives. Windshield wipers are now essential safety features, ensuring clear visibility for drivers in various weather conditions. Her ingenuity and determination have left a lasting legacy in the automotive industry.

Multiple Choice Questions

1 What is the main job of windshield wipers?

- ☐ A To make noise
- ☐ B To keep the windshield clear of rain and debris
- ☐ C To play music
- ☐ D To light up the road

CORRECT ANSWER

B

2 What does it mean when wipers move clockwise?

- ☐ A They move in the direction the clock ticks
- ☐ B They move in the opposite direction of the clock
- ☐ C They move up and down
- ☐ D They move left to right

CORRECT ANSWER

A

3 Which is not a function of Button?

- ☐ A Receiving the clicking
- ☐ B Receiving the double clicking
- ☐ C Receiving the triple clicking
- ☐ D Receiving the pressing

CORRECT ANSWER

C

●● Reflection Questions

- 1 What is the primary function of a windshield wiper in a car? Why is it an important safety feature?

- 2 Imagine a car without windshield wipers. What problems might a driver encounter in rainy or snowy weather?

- 3 Can you think of any other devices that use a similar movement to a windshield wiper? Explain how they are similar.
