## UNIT 2 COMPARING NUMBERS

### GREATER THAN AND LESS THAN

Let's learn more about the "greater than" ( $>$ ) and "less than" ( $<$ ) symbols. These symbols help us understand which number is bigger or smaller.

**GREATER THAN ( $>$ )** Think of the "greater than" symbol as a hungry alligator who always wants to eat the bigger number! For example,  $8 > 3$  means the alligator wants to eat the number 8 because it's bigger.

**LESS THAN ( $<$ )** The "less than" symbol is like the alligator with its mouth open towards the smaller number. For example,  $2 < 6$  means the alligator wants to eat the number 6 because it's bigger.

# Which one is bigger?

## COMPARISON OPERATION

The shark loves bigger numbers!

Compare the size of the treasure numbers and color the shark's mouth to open toward the larger number.
