## UNIT 4 DIVE INTO REAL-LIFE COMPARISONS

### APPLYING COMPARISON IN REAL-LIFE SCENARIOS

Let's explore how we use comparison operators in real life! Whether we're comparing ages, the height of plants, or the scores of a game, comparison helps us understand relationships and make decisions.

#### Practical Examples:

**COMPARING AGES** If you're 8 years old and your friend is 7, you can write:  $8 > 7$ . This shows that you are older than your friend.

**COMPARING SCORES** After playing a game, you might want to compare scores. If you scored 15 points and your friend scored 20, you can write:  $15 < 20$ . Your friend won this round!

## Multiple Choice Questions

### 1 What is a comparison in math?

- ☐ A Looking at the colors of different objects
- ☐ B Finding out if one number is larger, smaller, or equal to another number
- ☐ C Counting how many objects are in a group
- ☐ D Drawing pictures of different objects

CORRECT ANSWER

☒ B

### 2 What symbol would you use to show that 7 is greater than 5?

- ☐ A  $<$
- ☐ B  $=$
