UNIT 4 PEACOCK CREATION

THE ORIGIN OF PEACOCKS:

A long time ago, peacocks lived in the forests of South Asia, including places like India and Sri Lanka. They loved living in these warm and green places because there was plenty of food and space to show off their beautiful feathers.

WHY ARE THEY SO SPECIAL?

Peacocks are famous for their spectacular tails, with many colorful "eyes" on them. These feathers are called "train feathers." Peacocks spread their tails to make themselves look big and beautiful, especially when they want to attract a friend or show they're happy. This special display is called "fanning" their feathers.

● Multiple Choice Questions

1 What is the main reason peacocks spread their feathers?

- Ⓐ To eat more food
- Ⓑ To make themselves look big and beautiful
- Ⓒ To sleep better
- Ⓓ To fly higher

CORRECT ANSWER

Ⓑ

2 How many degrees are in a full circle?

- Ⓐ 180 degrees
- Ⓑ 360 degrees
- Ⓒ 45 degrees
- Ⓓ 90 degrees

CORRECT ANSWER

Ⓑ

3 What does the MODI Dial module do?

- Ⓐ It helps you change the color of lights.
- Ⓑ It allows you to turn a knob to control different things.
- Ⓒ It makes sounds louder or quieter.
