LET'S LIGHT UP OUR ROOM!

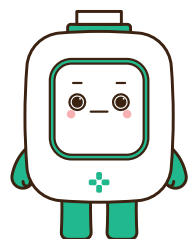

UNIT 1 WHY LIGHT IS IMPORTANT IN OUR LIFE?

WHAT IS LIGHT?

Light is something that helps us see everything around us. Without light, the world would be very dark, and we wouldn't be able to see colors, shapes, or anything at all!

What kinds of light are around us?

WHERE DOES LIGHT COME FROM?

Light comes from many places. The sun is the most significant source. During the day, it lights up the sky and makes everything bright. We use lamps, flashlights, or the moon and stars at night to help us see.

WHY DO WE NEED LIGHT?

SEEING THINGS

Light helps our eyes to see. We can read books, play games, and look at our toys when there is light.

STAYING SAFE

Light helps keep us safe. When it's dark, light from street lamps or our homes allows us to see where we are going.

HELPING PLANTS GROW

Plants need light to grow. Sunlight makes food, which helps them grow big and strong.

ACTIVITY: DRAW A PICTURE OF A SUNNY DAY

Let's draw a picture of a sunny day! Think about how light helps you see the trees, the sky, and your friends playing outside.
