UNIT 4 DIVE INTO FLOW

THE FIRST ARTIFICIAL LIGHT

A long time ago, people didn't have the lights we use today. It got really dark when the sun went down, so they had to use different ways to light up their homes and workspaces.

EARLY LIGHTS

CANDLES

The very first artificial lights were candles. People made candles from fat or wax to light up their homes. They would put a wick in the middle of the wax, and when they lit the wick, the candle burned and gave off light.

OIL LAMPS

Another early light was the oil lamp. People would fill a small container with oil and light it with a wick. The burning oil made light that helped them see at night.

THE INVENTION OF ELECTRIC LIGHT

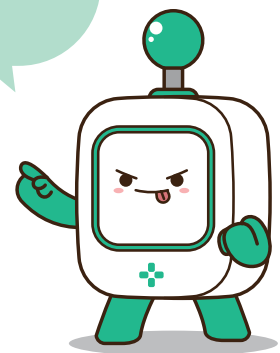

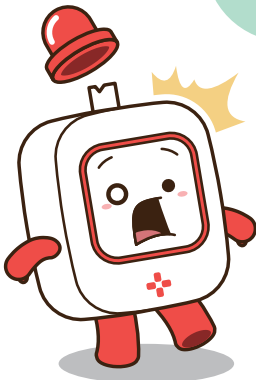

One of the most significant changes came when people invented electric lights.

THOMAS EDISON

A man named Thomas Edison worked very hard to create the first electric light bulb. In 1879, he succeeded! Electric light bulbs use electricity to produce light. This was much better than candles and oil lamps because it was safer and brighter.

Electric lights allowed people to stay awake longer and do more things in the dark, making life easier and more fun. Now, we have many kinds of lights, like lamps and flashlights, to help us in different ways.

● Multiple Choice Questions

1 What materials do you need to make a room light with LED and Button?

- Ⓐ Paper and Crayons
- Ⓑ LED, Button, and Button
- Ⓒ Plastic and Glue
- Ⓓ Wood and Nails

CORRECT ANSWER

Ⓑ

2 What happens when you press the button in your room light creation?

- Ⓐ The light turns off
- Ⓑ The light changes color
- Ⓒ The light turns on
- Ⓓ The button lights up

CORRECT ANSWER

Ⓒ

3 Why are electric lights better than candles and oil lamps?

- Ⓐ They are more colorful
- Ⓑ They are safer and brighter
- Ⓒ They are more expensive
- Ⓓ They are smaller

CORRECT ANSWER

Ⓑ

●● Reflection Questions

1 How do you think life was different before electric lights?

2 Can you think of a time when having light helped you do something important? What happened?

3 If you could invent a new type of light, what would it be like and why?
