THE ELECTRIC SPIN MOP

UNIT 1 WHY WE CLEAN

WHAT IS A ROBOT?

WHAT IS MOPPING?

Mopping is a method of cleaning floors using a wet cloth or mop. When you mop the floor, you use water and sometimes cleaning solutions to remove dirt, spills, and stains. This helps keep the floor clean and shiny.

WHY DO WE CLEAN?

REMOVING DIRT AND GERMS

Mopping helps remove dirt that a vacuum cleaner might miss. It also eliminates germs and bacteria on the floor, especially in places where people walk a lot.

CLEANING SPILLS AND STAINS

If you spill something on the floor, like juice or mud, mopping helps to clean it up quickly. This makes the floor look nice and prevents stains from setting in.

MAINTAINING A HEALTHY HOME

A clean floor is essential for keeping our home healthy. Regular mopping helps to remove dust and allergens, which can help everyone in the family breathe easier.

●● Activity: Mopping Fun! _____

WHY DO WE USE A MOP?

DISCUSS WHY MOPPING IS IMPORTANT AND WHAT IT HELPS TO CLEAN.

HOW DOES MOPPING HELP US?

SHARE WITH A FRIEND OR FAMILY MEMBER HOW MOPPING MAKES OUR HOME CLEANER AND HEALTHIER.
