UNIT 2 ROLES AND IMPORTANCE OF COMPUTERS

HOW WE USE COMPUTERS:

We use computers for so many things in our daily lives! We use them to learn new things, play fun games, watch favorite shows and movies, and talk to friends and family online.

WHY COMPUTERS ARE ESSENTIAL:

Computers help us do things faster and better. They can help teachers teach us new things, doctors treat patients, and parents work from home or stay connected with family and friends.

WHY WE LIKE COMPUTERS:

Computers make life easier and more fun! We can find answers to our questions quickly, create beautiful artwork, make music, and even learn new languages or skills without leaving our homes.

HOW COMPUTERS CHANGE THE WORLD:

Computers have changed the way we live in many ways. They have made it easier for us to shop online, to communicate with people from all over the world, and to access information and resources that were not available before.

WHAT COMPUTERS MIGHT DO IN THE FUTURE:

Computers are constantly improving and becoming more advanced. In the future, they might help us solve even more significant problems, like finding cures for diseases, exploring outer space, or creating new inventions that we can't even imagine yet.

Let's practice

Let's find the computer in the picture and circle it.
