UNIT 4 DIVE INTO FLOW

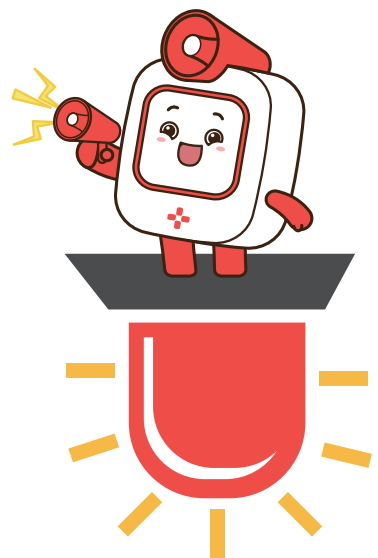

ALERT SYSTEMS: HELP US STAY SAFE!

Did you know that alert systems like fire alarms and doorbells are designed to keep us safe? They let us know if there is an emergency or someone at the door, helping us react quickly and stay protected.

LIGHTS AND SOUNDS CAN COMMUNICATE!

Alert systems often use lights and sound to get our attention. For example, a flashing light might tell us there's a fire, while a ringing doorbell lets us know someone is visiting. Both are effective ways to send important messages.

Multiple Choice Questions

1 What does an alert system do?

- ☐ A Makes music
- ☐ B Lets people know if someone needs help
- ☐ C Provides a place to eat
